

Gene Structural Annotation

This page displays information about the structural annotation of the *Arabidopsis thaliana* genome.

Genome Assembly

Provides a summary of current *Arabidopsis thaliana* genome assembly, including remaining gaps and unsequenced clones, and information on the groups involved in the sequencing effort.

Genome Annotation at TAIR

Describes the TAIR's structural annotation pipeline and information on the past and present annotation data.

Gene Structure Additions/Modifications

Information on how to submit suggestions for gene structure changes.

Original Genome Publications and Documents

Links to publications related to the original release of the *Arabidopsis thaliana* genome and documents about the *Arabidopsis* Genome Initiative.

Reference Genome Sequence (2008 Discussion - Historical Record)

The 2008 proposed policy statement on the *Arabidopsis thaliana* reference sequence with community comments.

Monsanto *Arabidopsis* Polymorphism and Ler Sequence Collections (Historical Record)

Information about the Cereon Ler sequence and polymorphism information formerly available through TAIR.
