

Resources

These pages include a curated set of bioinformatics and data resources that have been compiled by members of the International Arabidopsis Informatics Consortium (IAIC) and curators at TAIR. This is not a comprehensive list; if you know of a resource that you think should be included, please [send us an email](#).

Search within these pages for Arabidopsis community bioinformatics tools and data resources. You can use labels for data types such as 'proteomics' or 'gene_expression' or actions such as data submission or data analysis.

Browse by subject portals

[Epigenomics Resources](#)

[Education and Outreach Resources](#)

[General Databases](#)

[Gene Expression/Transcriptomics Resources](#)

[Metabolomics Resources](#)

[Mutant and Mapping Resources](#)

[Proteomics Resources](#)

[Stock Centers \(DNA, Seeds, other Physical Resources\)](#)

Or you can **browse** the list of resources **based on tags**.
